Senior Full-Stack Software Engineer | TypeScript, React, PostgreSQL & AI Systems

Turin, Italy +39 335 82 30 421 valla.andrea@gmail.com avalla.github.io LinkedIn GitHub

Professional summary

Senior full-stack engineer with 20+ years of experience building and operating software systems. I work mainly with TypeScript, React, Node.js/Bun, PostgreSQL, and GraphQL.

In recent years I have also been working extensively with LLMs, AI agents, and AI-assisted development.

I usually work across the whole product lifecycle, from architecture and implementation to deployment and production operations.

Professional experience

Solution Architect, Full-Stack Developer & System Administrator

Feb 2022 - Sep 2026

BrandsDistribution.com · Turin, Italy

Worked across architecture, backend, frontend, integrations, data, and production operations.

Built queue-backed BDroppy integrations with Shopify, Squarespace, Wix, and EKM supporting 50,000+ connected stores; shipped apps through the Shopify and Wix app marketplaces.

Built Aidify, an AI-powered chatbot platform integrated with ecommerce channels.

Built a BI platform using BigQuery, Airbyte, Cube.js, and Looker Studio.

Designed and built AutoEpoque, a classic-car marketplace for classifieds and auctions, including the React/TypeScript product, PostgreSQL security model, background jobs, integrations, and database tests.

CTO & Co-founder

Mar 2018 - Jan 2022

Agile Factory · Turin, Italy

Took a real-time manufacturing execution system for SMEs from product concept and technical strategy through architecture, implementation, customer deployment, and operations.

Designed the integration architecture between industrial equipment, OPC UA/MQTT data flows, and customer ERP systems using ETL pipelines.

Built the product as two React applications backed by Node.js services and GraphQL, with Redis, Docker, automated tests, and code-quality tooling supporting delivery.

Full-Stack Developer

Jun 2015 - Mar 2018

Industrial Cloud, Politecnico di Torino spin-off · Turin, Italy

Delivered manufacturing web applications from analysis and product requirements through implementation, customer deployment, and ongoing updates.

Node.js · React · Elasticsearch · MySQL · PHP

Selected systems

AI Office

2026 - Present

Creator

Built an open-source platform for coordinating AI agents, tasks, pipelines, and runs.

Implemented durable execution, task locking, model routing, audit events, permissions, and controlled actions.

Integrated OpenAI, Codex, and Claude Code behind provider-neutral interfaces.

Designed the system so persistence, LLM providers, agents, and domain-specific behavior can be replaced or extended independently.
